PRECISION CUT & PRE-LABELED

BUILD FASTER & SMARTER

REDUCES FRAMING CYCLE TIMES

REDUCES LUMBER WASTE

CLEAN & ORGANIZED JOB SITES

REDUCE DUMPSTER FEES

GLOBAL WARMING —
WHY PRODUCE EXCESS WASTE?

You can have it all with the EZWALL® Innovative Framing Solution from A-1 Industries. Our precision-cut, pre-labeled wall framing kits help you build smarter and faster while eliminating waste.

No cutting on-site or related injuries, no unexpected delays that affect the entire project, and 20% faster cycle times than conventional framing methods. That means more homes and more profit for builders and framers. We start with your plans. Our designers will work with you every step of the way and make any changes before you build, eliminating costly job site errors and waste. Our state-of-the-art saws and proprietary technology precision cuts each piece with accuracy. So each piece has easy-to-understand, high-performance markings, and wall “kits are assembled to be used at the job site for ease of use. Once you’ve completed your first build with EZWALL®, you’ll never return to traditional stick framing.

With A-1’s lumber mill direct relationships, more than 45 years of experience, and proven track record of on-time deliveries, you can be sure you’ll be on schedule.

What is EZWALL®?

EZWALL® is an innovative precut, pre-marked framing package designed like wall panels but assembled in the field by framers instead of a wall panel plant. Each wall bundle is separately labeled for easy and fast installation.

Q: What framing materials are included with an EZWALL® package?

A: A-1 is a component manufacturer focused on adding value to lumber; therefore, we provide wall framing material that does not need to be cut, excluding sheathing.

Q: What installation documentation is included with EZWALL® job site packet?

A: Fully dimensioned wall placement plans, individual wall shop drawings with framer-friendly marking showing all cut pieces (Ex, bottom/top plates, jacks, cripples, sill plates).

Q: What are the advantages of EZWALL®?

A: There are several advantages of EZWALL®, including quicker and more efficient assembly, framing waste reduction, safe to assemble – minimal saw time required on site.

Q: How are EZWALL® products delivered?

A: EZWALL® frame kits are delivered on flat bed (trailers) and off loaded with a Moffet for proper placement and to ensure the package bundles remain intact.
