PRECISION CUT & PRE-LABELED

BUILD FASTER & SMARTER

REDUCES FRAMING CYCLE TIMES

REDUCES LUMBER WASTE

CLEAN & ORGANIZED JOB SITES

REDUCE DUMPSTER FEES

GLOBAL WARMING —
WHY PRODUCE EXCESS WASTE?

You can have it all with the EZWALL® Innovative Framing Solution™ from A-1 Industries. Our precision-cut, pre-labeled wall framing kits revolutionize construction, ensuring faster builds with minimal waste.

Reduce on-site cutting and unexpected delays, and realize 20% faster cycle times than conventional framing methods. That means more homes and more profit for builders and framers. We start with your plans. Our designers will work with you every step of the way and make any changes before you build, eliminating costly job site errors and waste. Our state-of-the-art saws and proprietary technology precision cuts each piece with accuracy. So, each piece has easy-to-understand, high-performance markings, and wall kits are assembled on-site for ease of use. Once you've completed your first build with EZWALL®, you'll never return to traditional stick framing.

With A-1's lumber mill direct relationships and a proven track record of on-time deliveries, you can be sure you'll be on schedule. At A-1, we work with single-family, multi-family, and custom home builders, supplying the best products at competitive pricing and delivering them where and when you need them – that's the A-1 partner pledge.

What is **EZWALL**[®]

An innovative pre-cut, pre-marked framing package assembled in the field by framers, not off-site. Each wall bundle is labeled for easy and efficient installation.

Q: What framing materials are included with an EZWALL[®] package?

A: A-1 is a component manufacturer focused on adding value to lumber; therefore, we provide precision cut wall framing material, excluding sheathing.

Q: What installation documentation is included with EZWALL[®] job site packet?

A: Fully dimensioned wall placement plans, individual wall shop drawings with framer-friendly markings.

Q: What are the advantages of EZWALL[®]?

A: A quicker and more efficient assembly, material waste reduction, less skilled labor, safer to assemble with minimal on-site saw time, Plan / Design issues addressed in advance of framing.

Q: How are EZWALL[®] products delivered?

A: EZWALL[®] frame kits are delivered on flatbed trailers, which are offloaded with a Moffet for proper placement and ensuring bundle integrity.

Build smarter, build faster, build with confidence – build with **EZWALL**[®]
